1 Introduction

1.1 Huh

Alright. Let's begin with an equation:

$$f(x) = x^2 e^2 - \frac{5}{8}\lambda \tag{1}$$

$$\lambda 5 \lambda 3$$

Also, here's another equation.

1.2 Woah

2 Hello World!

$$f(g(x)) = g(f(x)) \tag{2}$$

$$\lambda a \cdot b \cdot ab$$

Welcome,

$$f(g(x)) = g(f(x))$$

.

$$1 + 2 = 3$$
$$1 = 3 - 6$$

$$\int_b^a \frac{1}{3} x^3$$
1

$$\begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix}$$

3 What is going on dafuq!

Figure 1: My first autogenerated plot.
